

Owens Design

YOUR DESIGN + BUILD PARTNER

Inside Sales Specialist

Are you tired of selling the same product year after year to the same old customers? Do you want to work for a company where you can make an impact and where your contributions really matter? Do you want to sell into companies that are on the leading edge of technology and for a company that helps enable that technology to get to market?

Owens Design works with the leaders and future leaders of the cutting edge technologies that are helping the world. Your contributions will make their ideas a reality through a collaborative and efficient product development process. You will experience the excitement of a start up, the stability of an established industry leader and the backing of a company with a long and sound successful track record.

As a Inside Sales Specialist, you will be responsible to promote Owens Design's development and manufacturing services to companies in the solar photovoltaic, semiconductor, and related markets. Customers will include both equipment OEMs and product manufacturers. In this role you will manage the sales cycle from prospecting, to facilitating and conducting onsite presentations, and qualifying the potential projects. You will serve as the prospects primary point of contact during the front end sales cycle, developing the relationship, and ensuring the client needs are a business fit for the Company

If you would like to join this growing team, please send your resume to jobs@owensdesign.com.

Why work for us?

For over 25 years, Owens Design has specialized exclusively in designing and manufacturing complex, advanced technology systems. We have focused specifically on the semiconductor, hard disk drive and solar photovoltaic industries, and have turned product development into a science. This unique process has made us successful and attracted a world-class following. We value people who are passionate about collaboration, creativity, and quality. We rigorously focus our energy on the solutions and processes to achieve our and our customer's goals.
