### **Owens Design Announces Expansion to Larger Facilities**

*Fremont, California:* a provider of turnkey design and manufacturing services for complex capital equipment, announced that due to continued growth it is moving to larger facilities. The new facilities feature expanded design, manufacturing, and cleanroom space. Within a short distance of the current location, the Company's new address will be 47427 Fremont Blvd effective July 6, 2005. All phone numbers and email addresses remain the same.

John Apgar, President of Owens Design stated, "We are very excited to be expanding our facilities and adding additional capacity for our customers. We chose to remain in Fremont to stay close to our customer base to better serve their needs. With our expanded facilities we expect to achieve improved efficiencies while maintaining the innovative, reliable designs we are known for."

Since 1982 Owens Design has partnered with high-technology machine OEM's in their design and manufacturing product development. Owens Design serves customers in semiconductor, hard disk, biotech and emerging high technology industries.

### **About Owens Design**

Owens Design specializes in engineering and manufacturing of capital equipment. Located in Silicon Valley for over 25 years, they have been a strategic partner in the co-creation and manufacturing process for many leading OEM capital equipment companies. Owens Design engineers and manufactures customer's products from concept, through alpha, beta, pilot and on-going production. Their development process results in a rapid design cycle and concurrent manufacturing introduction. Owens Design has and continues to be an innovative and reliable partner for equipment companies in the semiconductor, solar and related industries.
